

Toronto Memory Program is participating in the following clinical trials. The investigational drugs under study are not currently available through standard care. If you are interested in learning more about our trials, please contact us at research@memorydisorders.ca or by phone at 416-386-9606.

<u>Status</u>	<u>Toronto Memory Program Clinical Study Listing</u>
Recruiting	3133K1-3000-WW Phase III A Long-Term Safety and Tolerability Study of Bapineuzumab in Alzheimer's Disease Patients.
Recruiting	ABE4869g Phase II A Study To Evaluate The Efficacy And Safety Of MABT5102A in Patients With Mild to Moderate Alzheimer's Disease.
Recruiting	DRI10734 Phase II Effect Of Different Doses Of SAR110894D On Cognition In Patients With Alzheimer's Disease On Donepezil (Aricept™)
Recruitment Closed	12936A Phase II Lu AE58054 Added To Donepezil (Aricept™) For The Treatment For Alzheimer's Disease
Recruitment Closed	160701 Phase III A Phase 3 Study Evaluating The Safety And Effectiveness Of Immune Globulin Intravenous (IGIV 10%) For The Treatment Of Alzheimer's Disease (The GAP study)
Recruitment Closed	H8A-MC-LZAM Phase III Effect Of LY2062430 On The Progression Of Alzheimer's Disease (The EXPEDITION Trial)
Restricted to LZAM participants	H8A-MC-LZAO Phase III Continued Safety Monitoring Of Solanezumab In Alzheimer's Disease (The EXPEDITION EXT Trial)
Recruitment Closed	A9951002 Phase II A Multiple I.V. Dose Study Of PF-04360365 In Patients With Alzheimer's Disease
Recruitment Closed	115727-301 Phase III Bapineuzumab in Patients With Alzheimer's Disease (ApoE4 Non-Carrier)
Restricted to 115727- 301 participants	115727-351 A Long-Term Safety and Tolerability Study in Subjects With Alzheimer's Disease

Recruitment CAD106A2203 Phase II
Closed A Study To Investigate The Safety, Tolerability And A β -Specific Antibody Response Following Repeated Injections Of Adjuvanted CAD106.

Recruitment AA4437420 Phase IIa
Closed A Study To Investigate The Efficacy And Safety Of T-817MAA In Patients With Alzheimer's Disease.
